# Comments on the 2021 Appropriation and Supplementary Appropriation Bills, 5 May 2021

Budget  
Office

# Outline

- Introduction
- Fiscal strategy guiding the 2021 Appropriations and Special Appropriations
- Monitoring the South African Economic Reconstruction and Recovery Plan
- Revisions to the estimated proportions allocated per economic classification
- Adjustments to main budget non-interest expenditure since 2020 Budget
- Revisions to the consolidated government expenditure
- Social Grants: Social protection expenditure
- Composition of spending in the 2021 Appropriations per vote
- Improving composition of spending
- Proportion of spending on programme 1: Administration
- Special Appropriation Bill
- Programmes available in the 2021/22 Budget to respond to Covid-19
- Real per capita spending declines
- Fiscal risks
- Global risks
- AGSA calls for act on accountability
- Conclusion

# Introduction

- Parliament is, in terms of the Money Bills and Related Matters Act, required to pass, with or without amendments, or reject the Appropriation Bill within four months after the start of the financial year to which it relates
- The Parliamentary Budget Office was established to support the Finance and Appropriations Committees in both Houses of Parliament with the implementation of the Money Bills and Related Matters Act of 2009
- This presentation focuses on analysis and comments on:
  - Policy priorities to be implemented by the 2021 Appropriation Bills
  - The Economic Reconstruction and Recovery Plan
  - The reprioritisation, social protection, and composition of spending over the MTEF
  - Key risks in realising fiscal policy objectives over the medium term
  - Key governance failures that could affect the implementation of the 2021 Appropriation Bill

# Fiscal strategy guiding the 2021 Appropriations and Special Appropriations

- The 2020 Budget proposed a significant reduction in growth of expenditure to reduce the budget deficit and level of debt by:
  - Reducing the public wage bill
  - Reforming state-owned companies and the Road Accident Fund
  - Across-the-board cuts to core government programmes
- Notwithstanding the negative socio-economic impact of Covid-19, the 2021 Budget continues to constrain government expenditure by:
  - Curtailing non-interest expenditure growth
  - Only temporarily support for social relief and public health services by:
    - Supporting low-income households for only part of 2021 and only increasing funding for health to respond to the Covid-19 pandemic
  - Adjusting the composition of spending by:
    - Freezing growth and reducing compensation while
    - Maintaining capital investment mainly through the implementation of the South African Economic Reconstruction and Recovery Plan

# Monitoring the implementation of the South African Economic Reconstruction and Recovery Plan

Priority Intervention	Public Funding
<b>Infrastructure investment and delivery</b>	Conditional Grants: Transport Education Health Human Settlements Water and Sanitation Municipalities
<b>Industrialisation through localisation</b>	All Departments
<b>Energy security</b>	Eskom
<b>Gender equality and economic inclusion of women and youth</b>	All departments
<b>Support for the recovery and growth of the tourism, cultural and creative industries</b>	Tourism; Sports, Arts and Culture
<b>Green economy interventions</b>	Environment, Forestry and Fisheries
<b>Mass public employment interventions EPWP</b> <b>Public Works</b>	Public Works: EPWP Employment and Labour
<b>Strengthening agriculture and food security</b>	Agriculture, Land Reform and Rural Development: Agricultural Conditional Grants
<b>Macro-economic policy interventions</b>	National Treasury, Trade Industry and Competition

# Revisions to the consolidated government expenditure per functional classification shows

- Declining support for the ERRP
- Reprioritisation of interventions, actions and outputs are required

# Adjustments to main budget non-interest expenditure since 2020 Budget

1. Includes the New Development Bank, financial support to state-owned companies and public entities, and the rescheduling of some infrastructure reductions introduced in the 2020 MTBPS

# Revisions to the estimated proportions allocated per economic classification

# Social Grants: Social protection expenditure

- Social grants provide continuous protection to the vulnerable
- The Covid-19 pandemic required additional support, specifically in 2020/21
- Between May 2020 and February 2021: R17.356 billion was paid to between 4.4 and 6.1 million beneficiaries

	2019/20 Revised estimate	2019/20 Actual outcome	2020/21 Estimate	2020/21 Revised estimate	2021/22 Estimate	2021/22 Growth from 2020/21 estimate

# Composition of spending in the 2021 Appropriations per vote that transfers to other spheres of government

- Transfers to provinces and local government are mainly in the form of conditional grants (CG) that could be monitored
- These CG are mainly for infrastructure spending, job creation and skills development
- Transfers by other votes are made to public entities, government components or other institutions that deliver services on behalf of government

R million	2020/21				2021/22				
	Revised estimate	of which transfers to provinces	transfers to local government	Percentage transfers to PG and LG government	Budget estimate	Special appropriations	of which transfers to provinces	transfers to local government	Percentage transfers to PG and LG government

# Improving composition of spending

## Other departments within votes

- Vote 11: Public Service and Administration
  - Centre for Public Service Innovation
  - Personnel: 30
  - Budget: R42.6 million of which Administration R21.5 million

## Proportion of spending on programme 1: Administration in the 2021 Appropriations per vote

- Varies between 0.7 per cent and 51.9 per cent of the total allocation per vote
- When excluding the transfers: The proportions change to, between 29.8 per cent and 100 per cent

## Duplication of functions within departments and between departments

- Conditional grant outputs
- i.e.: Government Communication and information services vs Public Service Administration (e-government services and information management) vs. Public Service Commission

# Proportion of spending on programme 1: Administration in the 2021 Appropriations per vote

Department	Grand total	Programme 1: Administration	Programme 1 as % of Grand total	Programme 1 as % of Grand total without transfers
4 Government Communication and Information Syste	749 684	176 038	23.5%	35.0%

# Special Appropriation Bill

- Appropriation of additional amount to Health
  - In addition to the Covid-19 component to the HIV, TB, Malaria and Community outreach grant of R1.5 billion, an amount of R1.25 billion is appropriated to procure COVID-19 vaccines
  - To implement a related COVID-19 vaccine research project
- Appropriation of additional amount to Social Development
  - An amount of R2.826 billion is appropriated to fund the extension of the Special COVID-19 Social Relief of Distress Grant
- Adjustment to appropriation of money to vote of Public Enterprises
  - An amount of R2.7 billion is reprioritised from the appropriation to SAA to implement the business rescue plan - comprising:
    - SAA Technical SOC Ltd (R1.663 billion)
    - Mango Airlines SOC Ltd (R819 million)
    - Air Chefs SOC Ltd (218 million)

# Programmes available in the 2021/22 Budget to respond to Covid-19

- Transport: Public Transport Network
- Water and Sanitation:
  - Regional Bulk Infrastructure
  - Water Services Infrastructure
- Health: HIV, TB, malaria and community outreach services
- Cooperative Governance:
  - Provincial Disaster Relief
  - Integrated Urban Development
  - Municipal Infrastructure
- Social Development: Early Childhood Development
- Sport, Arts and Culture: Community Library Service
- Human Settlements: Urban Settlements Development
- Public Works and Infrastructure: Expanded Public Works Programme
- Basic Education:
  - Education Infrastructure Programme
  - HIV and AIDS (Life Skills Education)
  - Learners with Profound Intellectual Disabilities
  - Maths, Science and Technology
  - National School Nutrition Programme

# Real per capita spending declines (1)

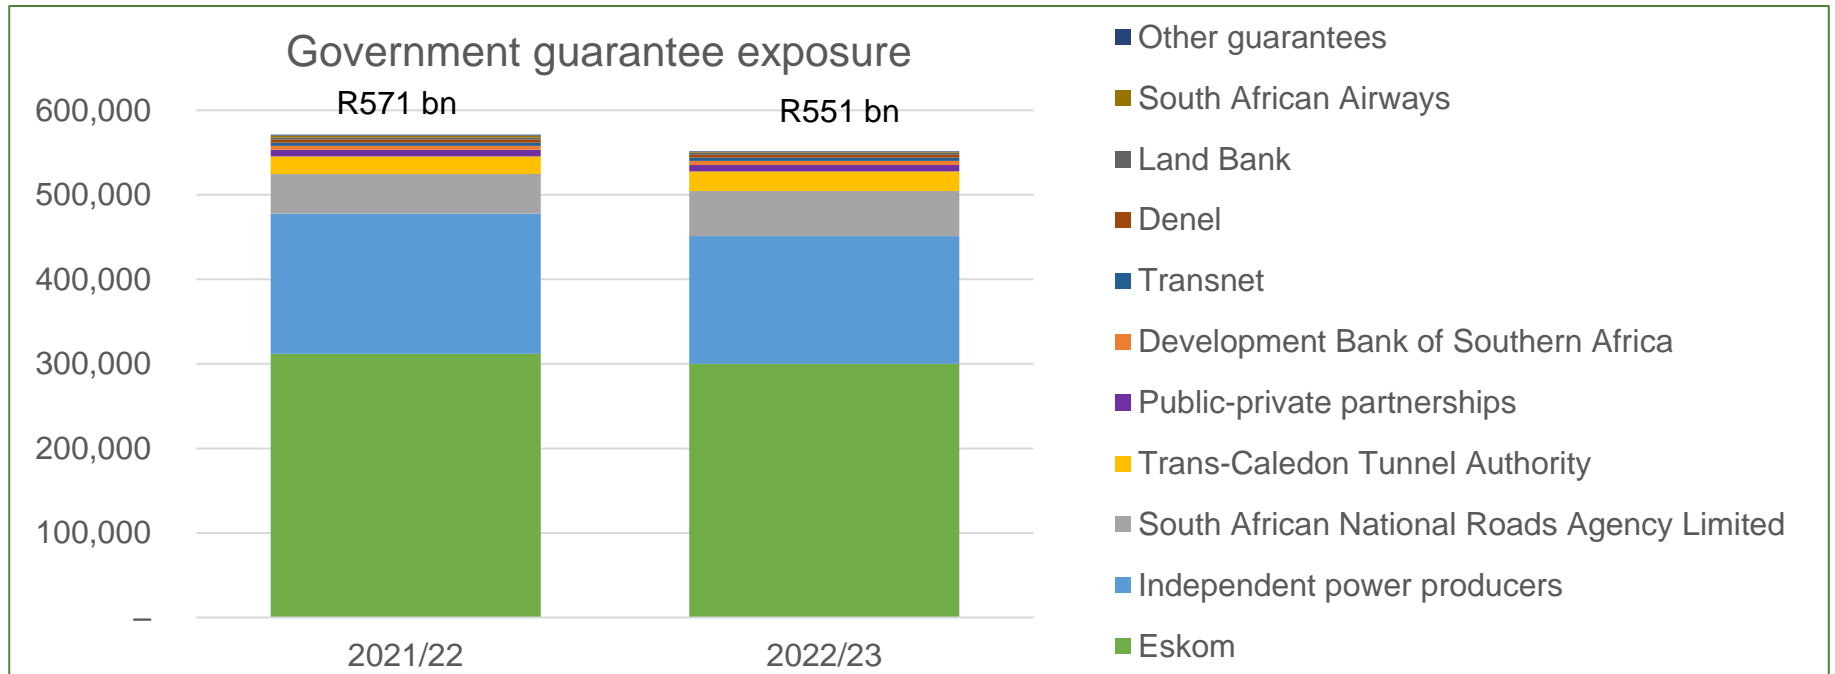

# Real per capita spending declines (2)

# Fiscal risks, reputational risks & credibility

- Continued fiscal consolidation will likely continue the multi-year trend of repeatedly missing debt reduction targets
  - Growth is required to reduce debt to GDP levels
  - Fiscal consolidation has constrained economic activity and growth
  - Prematurely discontinuing Covid-19 relief to households and small businesses could negatively impact on long-term growth and government revenue
- The reductions to real expenditure in key budget areas will probably not achieve fiscal consolidation, but may negatively impact future revenue collection by negatively affecting aggregate demand and GDP growth
- A new wave of Covid-19 could show that there is large, inadequate budgeting for Covid-19 relief in the 2021 Budget
- The credibility of government's MTEF and budgetary goals are in question because government may be forced to compromise on reducing COE
  - Reneging on wage agreements negatively affect labour relations
  - Determination to reduce COE could negatively affect morale and productivity in the public sector and hamper initiatives to reduce wasteful expenditure and corruption

# Fiscal risks

## Government could be liable for contingent liabilities and guaranteed debt

- The poor financial management of local governments and government entities may require more expenditure to maintain local government and for contingent liabilities
- SOEs and government entities with guaranteed debt may continue to have governance problems, poor management that negatively affects performance
- Fiscal consolidation and poor economic performance linked to the pandemic could continue to negatively impact revenues of SOEs and their financial positions
- Further declines in credit ratings could negatively affect national government finances directly and also the guaranteed debt of government entities and SOEs

# Fiscal risks: 2019/20 Financial Management in SOEs

- SOEs in in serious financial difficulty
  - State-owned entities are in serious financial difficulty and did not submit financial statements for auditing. This includes:
    - South African Airways and LMT Products (a subsidiary of Denel) which are under business rescue
    - SA Express is under provisional liquidation
- SOEs disclosed financial statement showing future uncertainty includes:
  - Petroleum Oil and Gas Corporation
  - South African Broadcasting Corporation
  - Denel and three subsidiaries Independent Development Trust
  - Land and Agricultural Bank of South Africa
  - Pelchem
  - South African Nuclear Energy Corporation
  - Eskom

# Further support for distressed SOEs

The 2021 Appropriation Bill seeks to appropriate

- R31.7 billion to settle Eskom's government guaranteed debt
- R4.3 billion to settle SAA's government guaranteed debt

This fiscal support to SOEs must be considered in the context of previous and ongoing support (over R300 billion since 2008):

<b>Summary of recapitalisations and bailouts of state-owned companies</b>

# Global risks

- Global risks that affect South Africa's economy and budget:
  - Increasing climate change events, e.g., droughts, flooding and fires
  - Possibility of more pandemics and other health crises
  - Private and public debt accumulation and risks of financial crises and contagion
  - Poor performance of key economies and global economy
  - High & rising levels of unemployment, inequality & instability
  - Increasing political instability, conflict and war
- Any of the above risks could impact on global and domestic economic performance and negatively affect fiscal position (government may have to increase expenditure and lower revenues)
  - Increased incidences of climate change events and health crises could require large expenditure and severely curtail revenue of government
  - Climate change and health risks require increased public sector expenditure and investment to mitigate the potential impacts
  - Higher global debt levels and risks of financial crises can constrain debt markets and push up interest rates while lowering investment levels, growth and revenue
  - The rebound of global economy after pandemic may be short-lived
  - Growing unemployment and inequality combined with climate and health risks lead to heightened risks of political instability, conflict and migration

# AGSA calls for action on accountability on use of public finances

- The sustainable solutions required to prevent accountability failures are not yet in place
- Oversight, executive authorities and coordinating departments should pay specific attention to state-owned entities, struggling public entities and key service delivery departments such as health and education
- Financial management discipline needed to protect public money and show transparency
- Preventing leakages and money that has been lost must be a priority of all accounting officers and authorities
- If consequences for accountability failures are required, these must be effected swiftly, bravely and consistently

# 2019/20 Departments Audit Outcomes

- The AGSA has noted that there were signs of improvement in use of public finance in some government department
- However, financial health of departments continued to be alarming
  - Unauthorised expenditure drastically increased to R18.12 billion in 2019/20 from R1.65 billion in 2018/19. This was a result of early payment of social grants in response to Covid-19 in April 2020
  - Over 60 per cent of the departments had insufficient funds to settle all liabilities that existed at year-end if the unpaid expenses at year-end (totaling R22.78 billion) were also taken into account
  - At year-end, 87 per cent of the departments had claims against them, totaling R147.12 billion. Claims are made against departments through litigation
- Nature of material irregularities
  - Procurement: overpricing of goods and services and appointed suppliers not delivering
  - Expenditure management: payment of goods and services not received or of poor quality and invoices not paid on time resulting in penalties
  - Revenue management: revenue not billed and debt not recovered
  - Resource management: no benefit derived from cost and assets not safeguarded and resulting in loss

# Conclusion

- The fiscal strategy in the 2021 Budget is to curtail non-interest expenditure growth and to adjust the composition of spending, while
  - Supporting low-income households for a part of 2021
  - Increasing funding for health to respond to the Covid-19 pandemic and
  - Maintaining capital investment mainly through the implementation of the South African Economic Reconstruction and Recovery Plan
- Notwithstanding the negative socio-economic impact of Covid-19, the 2021 Budget proposal fails to show how vulnerable societies and the economy will be protected
- The presentation demonstrated the main adjustments that were required to the main budget non-interest expenditure since the 2020 Budget, which includes:
  - The reduction of programme baselines
  - Wage bill estimated allocations
- The adjustments are meant to provide for:
  - The additional funding required to address the social and health needs of the Covid-19 pandemic
  - Provisional allocations as well as a contingency reserve, that will be appropriated during the adjustments budget

# Conclusion

- As part of the fiscal strategy to adjust the composition of spending, the presentation further provided a summary of the composition of the Appropriation bill per vote. This summary should give an indication where adjustments could be made to the composition of spending.
- This summary does not include all the programmes per vote.
  - A separate table, however, shows the proportion of spending on programme 1: Administration per vote. This could assist with recommendations towards the improvement of the efficiency of the composition of spending.
- The analysis of real per capita expenditure identifies risks in relation to the medium term decline in expenditure on local government services, safety and security and healthcare.
- The reductions to real expenditure in key budget areas are unlikely to achieve fiscal consolidation, but may negatively impact future revenue collection by negatively affecting aggregate demand and GDP growth.
- Other fiscal risks such as the reduction of the wage bill, public finance strategies and management as well as the global economic performance are likely to delay the realization of government's fiscal and strategic objectives over the medium term.
- The 2019/20 PFMA audit outcomes show signs of improvements, however, the financial health of many departments remains alarming.

Thank You

# 2019/20 Overall Audit Outcomes

## Overall audit outcome

66 Improved  
35 Regressed

### Departments audit outcome

30 Improved  
10 Regressed

### Public Entities:

36 improved  
25 regressed

### Outstanding audits:

44 audits had not been  
finalised by 30 Nov 2020

## Unauthorised, Irregular, and Fruitless and Wasteful Expenditure

### Irregular expenditure

R54.34 billion in 2019/20  
R66.90 billion in 2018/19

### Fruitless and wasteful expenditure

R2.39 billion in 2029/20  
R2.36 billion in 2018/19

### Unauthorized expenditure

R18.12 billion in 2029/20  
R1.65 billion in 2018/19
