# PROJECT PROFILE – D1043 GRASKOP-HAZYVIEW: SLIPFAILURE AND POTHOLE REPAIRS

Report Period: 28 March 2022

<b>PROJECT DESCRIPTION</b>	
<b>SAFETY IMPROVEMENT PROJECT - D1043 FROM P57/2 (GRASKOP) TO R40 HAZYVIEW (25.2KM) SHORT TERM REHABILITATION ACTION AND REHABILITATION OF A SLIP FAILURE AT KM11.9 IN THE EHLANZENI REGION OF MPUMALANGA PROVINCE</b>	
<b>CONTRACT NO: PWRT/2212/16/MP</b>	
<b>Scope of Works</b>	<p>The project consists of the rehabilitation of a slip failure caused by overtopping of the road drainage structure during heavy rainfall in February 2021. The road embankment will be backfilled to original contours, existing drainage structures to be cleaned and repaired where necessary and a new gabion cascade structure to be constructed at the location of overtopping to avoid damages in the future.</p> <p>The road section is also subject to severe pothole formations, which will be patched as part of the scope of works. Some failed road sections will be completely reconstructed. Additional activities involve the clearing of overgrown vegetation and clearing out silt from existing drainage structures.</p>
<b>Location</b>	<b>Between Graskop and Hazyview, Thaba Chweu Local Municipality, Ehlanzeni Region</b>
<b>Background</b>	With the heavy rains in the previous and current summer rain periods the slip failure deteriorated significantly, and urgent emergency repairs were required. With the severity of potholes in the same road section the project was extended to conduct additional maintenance activities at the same time.
