

NORTH WEST DEPARTMENT OF HEALTH

**COVID-19 VACCINE ROLL-OUT
HON MADODA SAMBATHA**

24 February 2021

PURPOSE

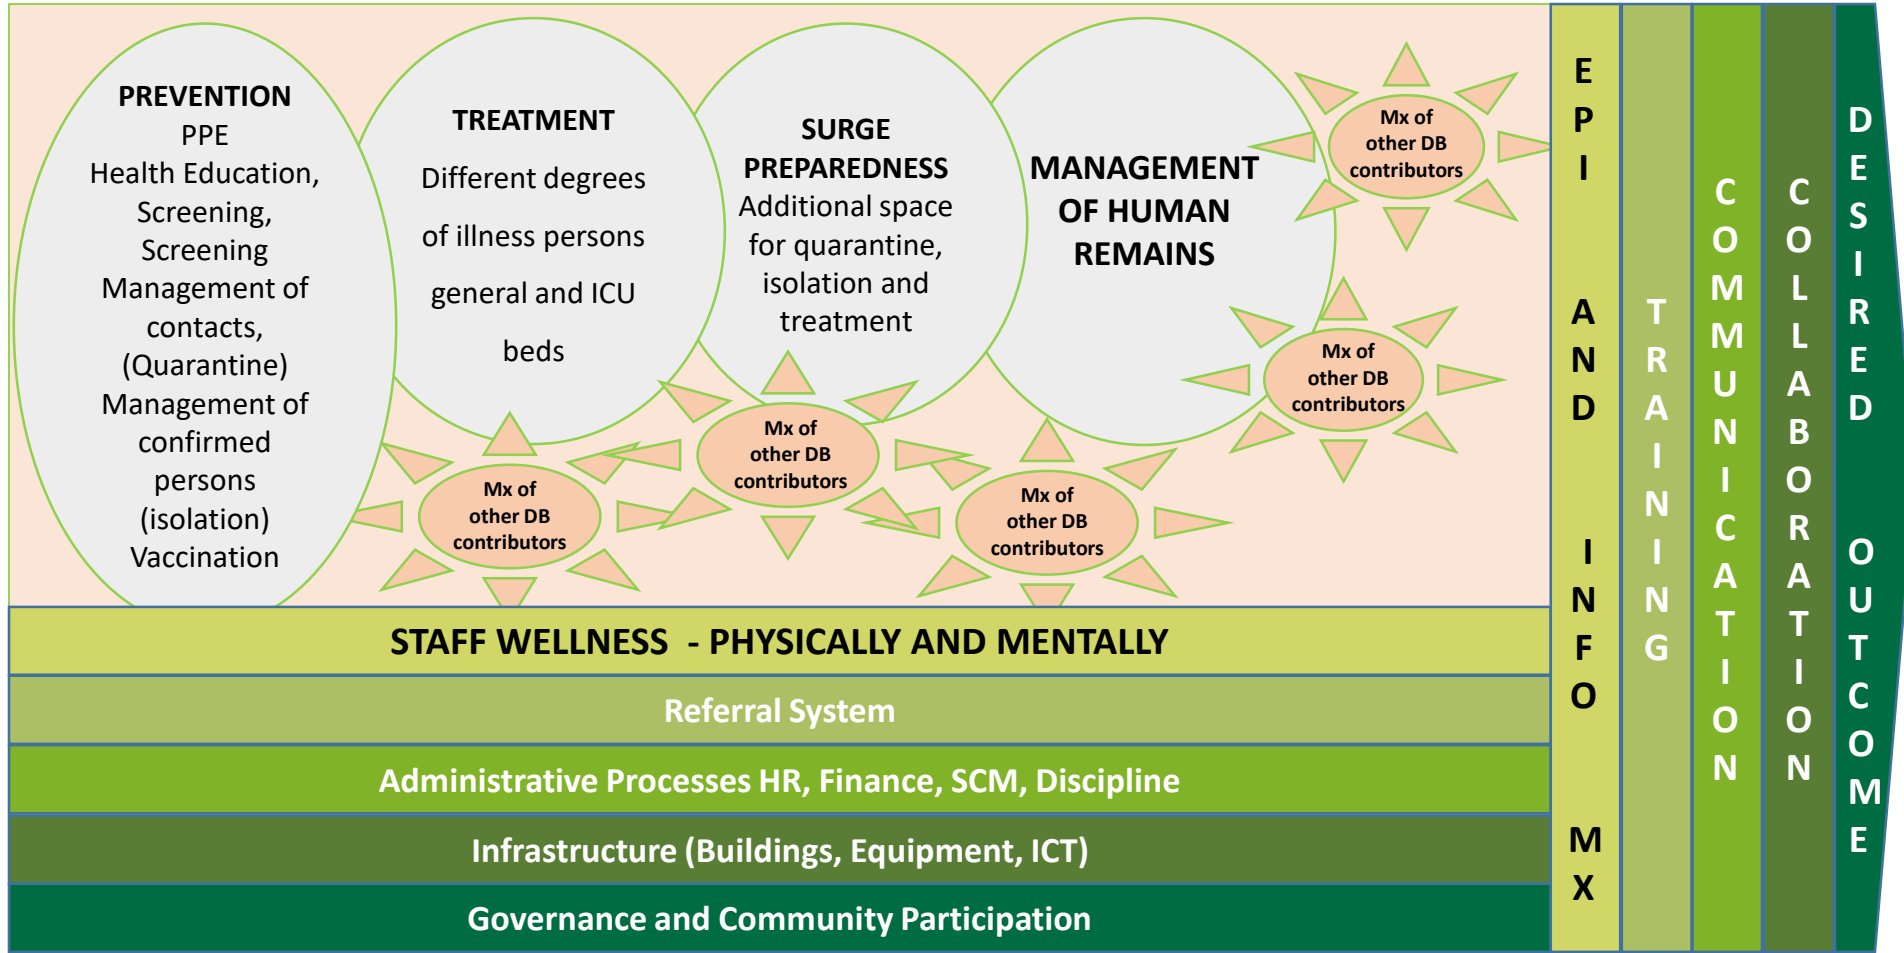

1. Providing Information
2. Obtaining further advice and direction

CONTENT

- Covid-19 Management Strategy
- admissions
- Morbidity data
- Affected NWDoH Staff
- Analytical Summary
- Treatment Response
- Challenges, Strengths, Risks
- Benchmarking with Western Cape and Eastern Cape
- Vaccine roll-out
- Way Forward

PILLARS OF THE NW COVID-19 STRATEGY

VACCINATION ROLL-OUT

- Vaccination is one of many interventions required to prevent **infection and death**
- Vaccination confers personal protection to a person who is vaccinated against a disease and it reduces the risk of infection
- Vaccination of communities aims to **achieve herd (population) immunity** and **prevent ongoing transmission.**
- **'population immunity'**, is the indirect protection from an infectious disease that happens when sufficient immunity develops in a population either through vaccination or through previous infection.
- Conventionally population immunity is achieved when more than 67% of the community develops immunity
- **Population immunity Lowers the possibility for a pathogen to circulate in the community therefore protecting those who cannot be vaccinated** (due to health conditions, like allergies, or their age) from the disease targeted by the vaccine

VACCINATION ROLL-OUT

1. Total Population of North West Province 4.1 Million
2. Population immunity target 67%
3. Population to be vaccinated to achieve population immunity 2.7 million

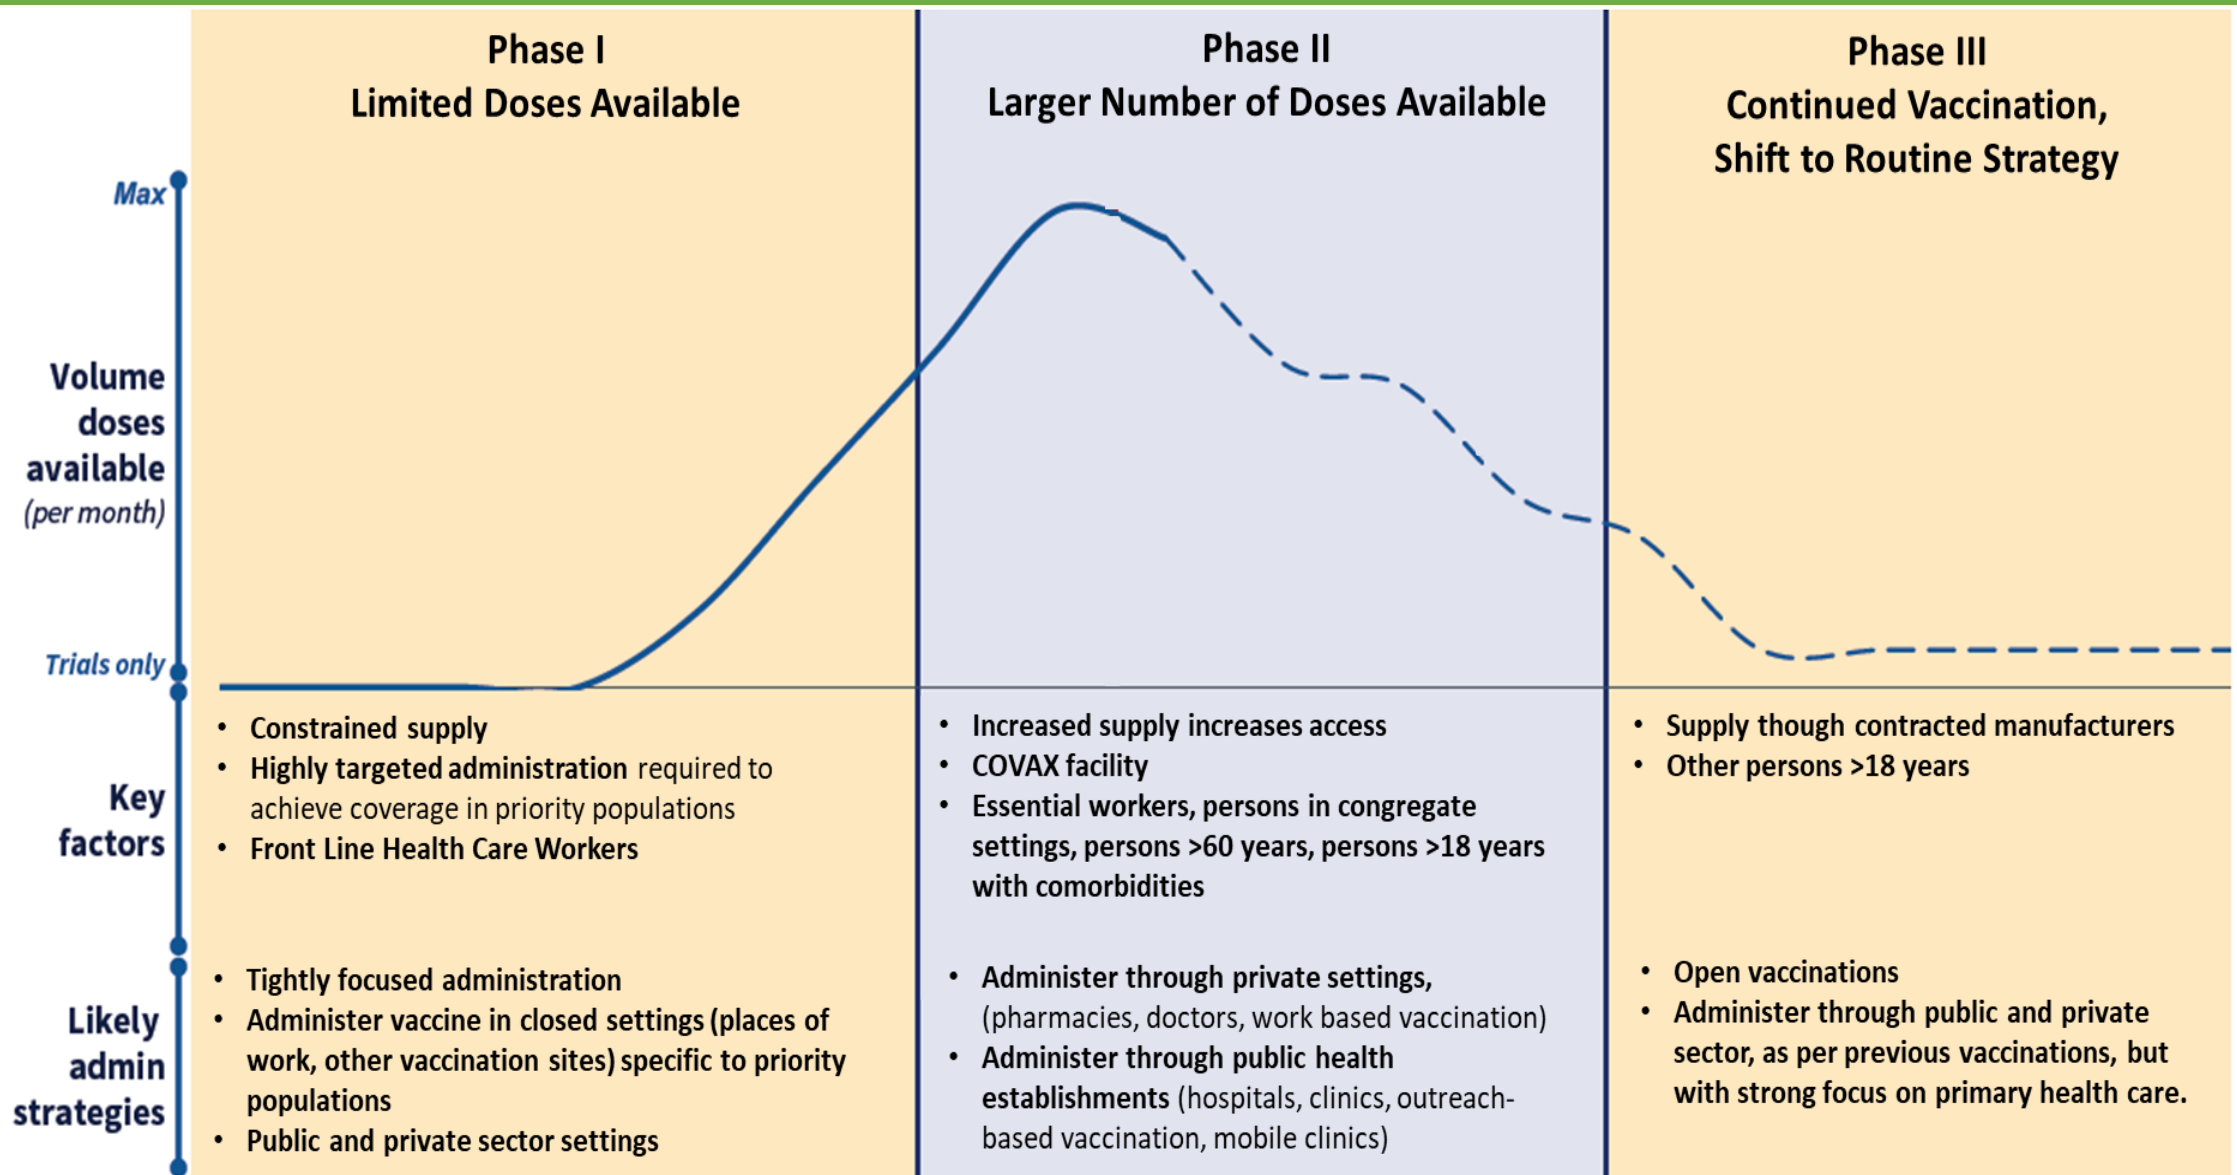

VACCINATION ROLL-OUT PILLARS

1. Governance, co-ordination and planning
2. Identification and prioritisation of target population
3. Vaccine allocation and vaccination site readiness
4. Human resources including training and supervision
5. Vaccine administration, cold chain, logistics and infrastructure
6. Safety surveillance
7. Data management, information systems and monitoring and evaluation
8. Communication and Demand creation
9. Financing and Budgeting

PHASES OF SOUTH AFRICA'S VACCINE PROGRAMME

17	M-Care Potchefstroom		

VACCINATION ROLL-OUT – PERFORMANCE TO DATE

COVID-19 Vaccinations

40402

Individuals Vaccinated To Date

Province	Individuals Vaccinated To Date
<input type="checkbox"/> Northern Cape	1815
<input type="checkbox"/> Eastern Cape	2603
<input type="checkbox"/> Free State	2749
<input type="checkbox"/> Mpumalanga	3580
<input type="checkbox"/> Limpopo	4011
<input type="checkbox"/> North West	4999
<input type="checkbox"/> Bojanala Platinum DM	2110
<input type="checkbox"/> Dr K Kaunda DM	2889
<input type="checkbox"/> KwaZulu-Natal	5500
<input type="checkbox"/> Western Cape	5831
Province, District	9314
All	40402

Individuals Vaccinated By Province To Date

Daily Number of Individuals Vaccinated

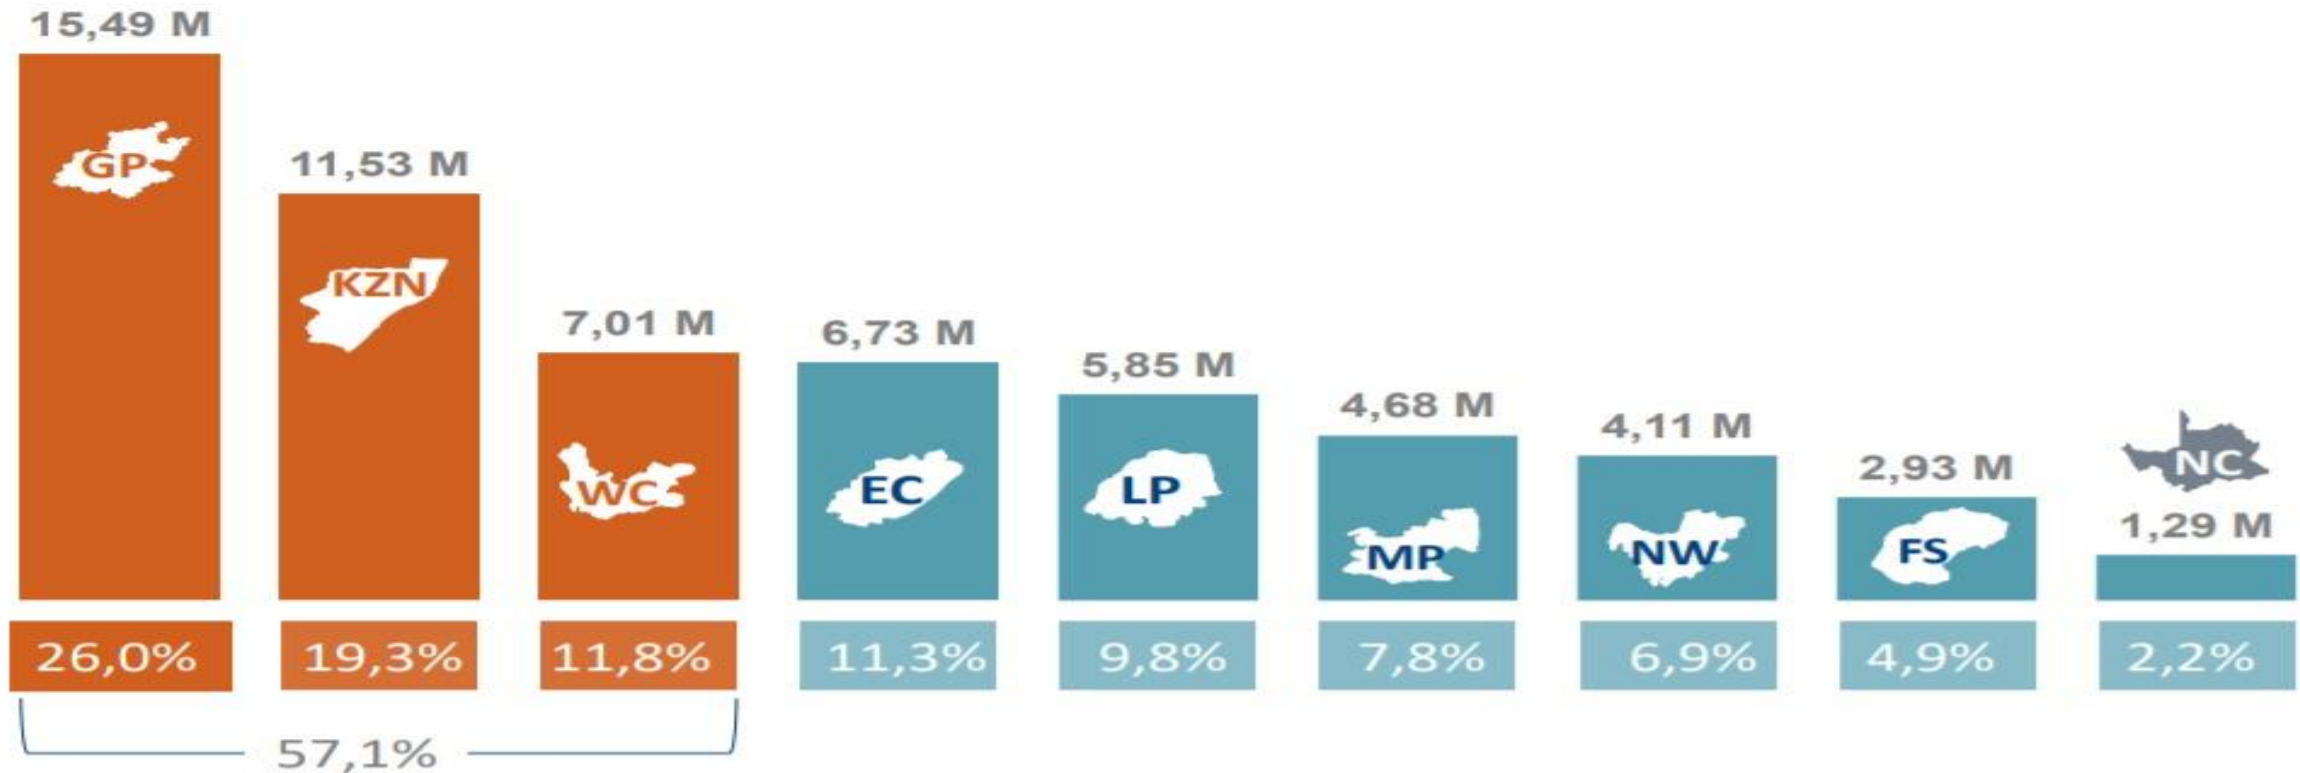

VACCINATION ROLL-OUT – PROVINCIAL POPULATION

More than half of the population live in 3 provinces (GP, KZN and WC)

GP remains SA's most populated province with approximately 15,5 million people (26%) living in this province.

Mid-year population estimates for South Africa by province, 2020

Stats SA: MID-YEAR ESTIMATES 2020

WAY FORWARD

- Increase the active sites in the province to reach more individuals sooner

THANK YOU

FOR YOUR CONTRIBUTION TOWARDS
HEALTH SYSTEM STRENGTHENING!

Doing good for
others is not a
duty...

It is a Joy!
